

News Release

ORISTEL APPOINTED BY ADVA OPTICAL NETWORKING AS VALUE ADDED PARTNER FOR DISTRIBUTION OF ITS OPTICAL NETWORKING SOLUTIONS

Partnership delivers most secured optical networks for Big Data era

Singapore, 13 June 2014 — Singapore Technologies Electronics Limited (ST Electronics) announced that its telecom systems integration arm, OrisTel Systems Pte Ltd (OrisTel), has been appointed by ADVA Optical Networking as its value added partner for the distribution of optical networking products to telecom service providers, government and utility customers in the Asia Pacific region.

OrisTel will leverage the synergies derived from ST Electronics' extensive customer base and ADVA Optical Networking's software-automated Optical+Ethernet transmission technology to deliver ultra-low latency core network solutions utilising the latest 100G, multi-degree ROADM and GMPLS technology for high-speed next-generation networks in the Asia Pacific region.

“Networks in the Asia Pacific region are developing at an incredible pace. Across every industry we’re seeing demand for greater scalability, greater efficiency and greater security. Our technology, our team, excels at meeting these demands. It’s our core objective. Our partnership with OrisTel will enable us to move quicker than ever before. With their strong customer base and focus on customer experience, we’ll be able to drive the region’s networks to new heights.”

**~ Erik LINDBERG,
Vice President, Sales APAC, ADVA Optical Networking**

"We are confident that by combining the strengths, resources and expertise of ADVA Optical Networking and OrisTel, we will deliver highly secured and scalable optical network solutions of the highest quality to our customers and achieve market success for both companies in the Asia Pacific region."

**~ GOH Wai Pheng
SVP/General Manager, OrisTel Systems &
Deputy President, ST Electronics (Satcom & Sensor Systems)**

ADVA Optical Networking is creating new opportunities for tomorrow's networks, a new vision for a connected world. Our intelligent telecommunications hardware, software and services have been deployed by several hundred service providers and thousands of enterprises. Over the past twenty years, our innovative connectivity solutions have helped to drive our customers' networks forward, helped to drive their businesses to new levels of success. We forge close working relationships with all our customers. As your trusted partner we ensure that we're always ready to exceed your networking expectations. For more information on our products and our team, please visit us at: www.advaoptical.com.

OrisTel Systems, a subsidiary of ST Electronics which is one of Asia's largest Info-Communications Technology solutions house, addresses the complex telecom network infrastructure needs of telecom operators, government and utility customers across the Asia-Pacific region. As a regional systems integration partner of several leading-edge telecom equipment manufacturers, OrisTel brings the combined resources and expertise of ST Electronics and product partners to deliver best-in-class telecom solutions of the highest quality to its customers.

ST Electronics (Singapore Technologies Electronics Limited), the electronics arm of ST Engineering, delivers innovative system solutions to government, commercial, defence, and industrial customers worldwide. With a presence in more than 20 countries, ST Electronics markets its solutions to more than 100 countries internationally. It specialises in the design, development and integration of advanced electronics and communications systems, such as broadband radio frequency and satellite communication, e-Government solutions, information communications technologies and IT, rail and traffic management, real-time command and control, modelling and simulation, eLearning & interactive digital media, training services, intelligent building management and information security.
