ORISTEL, APPOINTED BY ADTRAN AS PARTNER OF CHOICE FOR DISTRIBUTION OF ITS BROADBAND ACCESS & OPTICAL TRANSMISSION PORTFOLIO

***Partnership addresses the complex telecommunication network
infrastructure needs of Telecom Service Providers, Government and
Utility Customers in the Asia Pacific Region***

Singapore, 2 April 2014 — Singapore Technologies Electronics Limited (ST Electronics) announced that its telecom systems integration arm, OrisTel Systems Pte Ltd (OrisTel), has been appointed by ADTRAN, Inc (Adtran) as its preferred partner for the distribution of broadband access and optical transmission products to telecom service providers, government and utility customers in the Asia Pacific region.

OrisTel will leverage the synergies derived from ST Electronics' extensive customer base alongside ADTRAN's leading technologies to drive the expansion of its telecommunication network infrastructure business in the Asia Pacific region.

"ADTRAN continues to grow its global reach and we believe this partnership with OrisTel will successfully expand our market penetration even further in the Asia Pacific region. As a leading global provider of networking and communications equipment, we deliver innovative solutions that reinvent the networks, enabling companies to evolve, change and grow. We look forward to a prosperous relationship with OrisTel."

***~ Eduard Scheiterer,
Managing Director, Adtran***

"We are confident that by combining the strengths, resources and expertise of Adtran and OrisTel, we will achieve a win-win business collaboration for both of our companies and will deliver best-in-class telecom solutions of the highest quality to our customers."

***~GOH Wai Pheng
General Manager, OrisTel Systems &
Deputy President, ST Electronics (Satcom & Sensor Systems)***

The partnership with OrisTel will help ADTRAN to provide both its technology solutions and value-added support to meet the increasing demand in the Asia Pacific region. OrisTel Systems is now poised to deliver a broader selection of telecom solutions to meet the complex telecommunication network infrastructure needs of its growing customer base with the support of one of the world's leading networking and communications equipment providers.

ADTRAN, Inc. is a leading global provider of networking and communications equipment. ADTRAN's products enable voice, data, video and Internet communications across a variety of network infrastructures. ADTRAN solutions are currently in use by service providers, private enterprises, government organizations, and millions of individual users worldwide.
